LASER DEVICE

TOWER LIGHT

TOWER LIGHT 0.5 is a 3B Class laser device, provided with adjustable power from zero 500 mW. It is capable to treat with benefit every pathology, with care and safety.

TOWER LIGHT 0.5 is suitable for performing treatment over the trigger points, for treating inflammated and painful areas.

TOWER LIGHT 0.5 is a special laser device capable to be effective all over the required pathologies by granting delivery of the proper energy density, without any risk for the patient in a very small time.

TOWER LIGHT 0.5 LIGHT 0.5 is a modern and innovative laser light generator capable to deliver high energy density in a few time and granting, at the same time, safety belonging to the Class 3 B laser devices. Max intensity of LIGHT 0.5 is 500 mW. Frequency is adjustable from 1 to 300 Hz and it is possible to perform treatment over the trigger points and also over all the areas of the human body. A large bibliography with suggested protocols is also available and the most expert operators may enter several customized protocols. A "friendly use" software is granting to the operator a very simple approach.

Technical features

- Power consumption: 60 VA

- Power supply: 115 – 230 V – 50/60 Hz
- EEC Directive 93/42: IIb
- Protection Class CEI 62-5: 1BF
- Dimensions: cm 23x17x26 h
- Laser source: solid state IR 808 nm
- Emission mode: continuous interrupted (pulsed)
- Modulation: up to 300 Hz
- LCD: graphic and colored
- Pre-set programs with body pictures
- Free memories for customized protocols
- Applicator size: Ø 10 mm
- Protective goggles Further generators
- Multifrequency 1 – 3 MHz ultrasound
- 4 output channels electrotherapy
- 2 output channels universal electrotherapy
- Magnetic field generator
- Thecartherapy
